Medical Products for the healthcare sector

Our Medical Products are specially designed to meet the needs of the healthcare sectors:

• Advanced Infection Control

- Single use, disposable products are proven to significantly reduce the risk of cross contamination and infection.

• Hygienic System

- Staff contact time with used products reduced.
- No rinsing and washing needed after use.
- Simply place the used product in the macerator and it is removed from the healthcare environment.
- The product is reduced to a fine slurry and released directly into the sewerage system.

• User friendly

- Products promote patient independence.
- All our products are stackable and easily separated.
- Patients will find our products easy and comfortable to use.
- Staff will find our products sturdy, stable and reliable.

• Savings

- Very low cost per product.
- Macerators, in comparison to traditional washers, enable savings of up to 90% per cycle.
- Reduced infection rates means savings all round.

• Improved Environment

- Lower carbon footprint.
- Medical Pulp is biodegradable.

All our Medical Products are tested in accordance with **PAS29:1999** for water retention & maceration in a healthcare environment.

Our products are **professionally designed** to provide a comfortable hygienic solution for patients.

Our innovative designs mean staff will find our products **sturdy and leak-proof** for at least 4 hours.

A single use, disposable system is the most **simple and effective** way to reduce the risk of healthcare acquired infections.

E2P are the market leading experts in producing Europe's moulded pulp products. Our medical products range is perfect for the requirements of customers such as:

- Clinics and Hospitals
- Nursing Homes
- Healthcare Centres
- General Practitioners

100 % hygienic
Complete elimination in macerators
